

What to Do if an Electricity Shortage Happens: Step-by-Step

1. **Check the Circuit Breaker**
Inspect the circuit breaker for any tripped switches and reset them if necessary.
2. **Turn Off Electrical Appliances**
Switch off all non-essential electrical appliances to prevent overload when power is restored.
3. **Use Flashlights or Battery-Powered Lights**
Use flashlights or battery-powered lights to maintain visibility if it's dark.
4. **Check for Power Restoration Updates**
Contact the utility provider or check online to get an estimated time for power restoration.
5. **Preserve Food**
Keep the refrigerator and freezer doors closed to maintain cold temperatures and preserve food.
